Dear customers, partners and service providers,

As part of our BCM measures, we constantly review the current risk situation. Due to the dynamic development of the pandemic, we would like to inform you regularly about the current status even if the situation remains unchanged.

At present, the current pandemic situation still doesn’t lead to any restrictions on services and projects. “Level 0” of our communication level plan remains unchanged.

As a result of the amendments to the Second Bavarian Ordinance of Infection Protection Measures, there will be an obligation to wear a mouth-and-nose covering at various locations in Bavaria/Germany, beginning 27th of April 2020. Even if our datacenters are not affected, we have also introduced a corresponding obligation to wear masks there, to protect the health of visitors and employees.

Within the business premises of noris network AG, all persons must wear a mouth-and-nose cover if a minimum distance of 1.50 m to other persons cannot be maintained. We ask for your understanding in this respect. Please ensure that you have an appropriate mouth-and-nose cover, when visiting our datacenters.

kindest regards
noris network AG

Markus Laube
BCO
